

Patient Safety MOVEMENT

September 17th, 2020 is International Patient Safety Day.
Now through 9/17/20 you can help us take strides toward safer healthcare.

The Maryland Patient Safety Center is a proud partner of the Patient Safety Movement Foundation (PSMF). Since launching the PSMF in the mobile app [Charity Miles](#) they have seen nearly 200 of the most loyal supporters walk 4,731 miles or approximately 11 million steps! *That's incredible!*

If you haven't joined us yet, it's as easy as 1, 2, 3...

1. Download Charity Miles (follow the link below)
2. When you walk, run, or bike open Charity Miles and start a workout.*
3. Your miles will support the Patient Safety Movement Foundation and will demonstrate your dedication to eliminating preventable patient deaths - including the health workers at risk during this pandemic.

*If you already track your workouts through Strava, Apple Health or Peloton once you link those programs with Charity Miles they'll automatically log your miles. If you have questions visit our [FAQ](#).

[DOWNLOAD THE APP](#)

Now, join the Maryland Patient Safety Center's team. You can simply log your steps in support of patient safety; but if you gather pledges from friends and family, 100% of the funds will go to support programs that have been shown to reduce preventable deaths.

A dedicated group of Marylanders can go far together. We look forward to making strides with you!
